Majestic Gold Corp.
Notes to the Condensed Consolidated Interim Financial Statements
For the six-month period ended June 30, 2026 and 2025
(Unaudited - expressed in US dollars)

1. Nature of operations

Majestic Gold Corp. (the “Company” or “Majestic”) is incorporated under the laws of the province of British Columbia, Canada. The Company is listed on the TSX Venture Exchange (“TSX-V”) where its common shares trade under the symbol “MJS”. The Company’s corporate office, principal address and the registered and records office is located at 306 – 1688 152nd Street, Surrey, British Columbia, Canada, V4A 4N2.

Majestic is a mining company focused on the exploration, development, and operation of mining properties in China.

In February 2025, the Company completed the acquisition of 52% equity interest in Yantai Mujin Mining Co., Ltd. (“Yantai Mujin”) and the Mujin Gold Project, through its 58.75% indirect owned subsidiary, Majestic Yantai Gold Ltd and 58.75% indirect owned subsidiary, PRG Res HK 2 Limited (“Mujin Acquisition”), resulting in Majestic holding a 30.55% net interest in Yantai Mujin.

On February 10, 2026, the Company announced that operations at both its Songjiagou Gold Project and Mujin Gold Project have been temporarily suspended following notification from the Yantai Emergency Management Bureau that all gold mining operations in Yantai were required to cease immediately. The suspension has been ordered in response to a serious accident that occurred on February 7, 2026 at an unrelated third-party mining operation in Zhaoyuan City, Yantai.

During March 2026, the Company resumed operations at the Songjiagou (“SJG”) Gold Project and the Mujin Gold Project.

During the temporary suspension of operations, the Company continued to incur costs at its two gold projects. For the period ended June 30, 2026, total suspension-related costs of \$2,253,382, which includes non-cash depreciation expense of \$332,710, have been presented as a separate line item, “suspension costs,” in the consolidated statements of comprehensive income. These costs have been excluded from cost of sales, other direct production costs, and depreciation, depletion and amortization.

2. Basis of preparation and material accounting policies

Statement of compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting. The policies applied in these financial statements are based on International Financial Reporting Standards (“IFRS”) issued and outstanding as at August 30, 2026, the date the board of directors approved these consolidated financial statements for issue.

Basis of preparation

These unaudited condensed consolidated financial statements of the Company have been prepared on an accrual basis and are based on historical costs, modified where applicable.

Since these unaudited condensed consolidated interim financial statements do not include all disclosures required by the International Financial Reporting Standards (“IFRS”) for annual financial statements, they should be read in conjunction with the Company’s annual consolidated financial statements for the year ended December 31, 2025.

The unaudited condensed consolidated financial statements are presented in US dollars (“USD”) unless otherwise noted.

Basis of consolidation

The unaudited condensed consolidated financial statements include the accounts of the Company and its controlled entities. All inter- company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated on consolidation.

Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at the acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Company, liabilities assumed by the Company to the former owners of the acquiree and the equity interests issued by the Company in exchange for control of the acquiree. For each business combination, the Company elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition-related costs are expensed as incurred.

The Company determines that it has acquired a business when the acquired set of activities and assets includes an input and a substantive process that together significantly contribute to the ability to create outputs.

When the Company acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts of the acquiree.

If the business combination is achieved in stages, the previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or other comprehensive income, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability is measured at fair value with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests and any fair value of the Company's previously held equity interests in the acquiree over the identifiable assets acquired and liabilities assumed. If the sum of this consideration and other items is lower than the fair value of the net assets acquired, the difference is, after reassessment, recognised in profit or loss as a gain on bargain purchase.

Majestic Gold Corp.
Notes to the Condensed Consolidated Interim Financial Statements
For the six-month period ended June 30, 2026 and 2025
(Unaudited - expressed in US dollars)

2. Basis of preparation and material accounting policies (continued)

Business combinations and goodwill (continued)

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Company performs its annual impairment test of goodwill as at December 31. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Company's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Company are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (group of cash-generating units) is less than the carrying amount, an impairment loss is recognised. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Where goodwill has been allocated to a cash-generating unit (or group of cash-generating units) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on the disposal. Goodwill disposed of in these circumstances is measured based on the relative value of the operation disposed of and the portion of the cash-generating unit retained.

Use of estimates

The preparation of financial statements in accordance with IFRS requires the Company to make estimates and assumptions concerning the future. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted prospectively in the period in which the estimates are revised.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting periods include:

a) The useful lives of property, plant, and equipment

Depreciation is calculated on the straight-line basis to depreciate the cost of each item of plant and equipment and Right-of-use assets ("ROU") to its residual value over its estimated useful life. Useful lives are determined based on management's past experience with similar assets, estimated changes in technologies and in the case of mining-related plant and equipment, estimated mine lives. If the estimated useful lives change significantly, adjustment of depreciation will be provided in the future year.

The useful lives of the Company's mineral property and mining infrastructure are based on indicated gold resource and probable reserve estimates based on a certain grade cut-off level. Assumptions that influenced cut-off grade include the expected future price of gold, projected operating costs and discount rates. Changes to these assumptions and further analysis of the Company's gold resource and reserve estimates could significantly impact the expected useful lives of the Company's mineral property and related infrastructure.

b) Asset retirement obligation

The asset retirement obligation is based on projected future costs associated with mine reclamation and closure activities on the Company's SJG Open-Pit Mine, SJG Underground Mine, DGZ Underground Mine, Chahe Underground Mine and Houzhuang-Heiniutai Underground Mine. These estimates are based on current Chinese environmental laws and regulations. Future changes to such laws and regulations as well as changes to the Company's intended mining operations could significantly impact this provision.

Notes to the Condensed Consolidated Interim Financial Statements
For the six-month period ended June 30, 2026 and 2025
(Unaudited - expressed in US dollars)

2. Basis of preparation and material accounting policies (continued)

Use of estimates (continued)

c) Impairment of the Company's mining assets

When assessing whether there are indicators of impairment of the Company's mining property and related assets, the Company considers internal and external factors, including:

- (i) Market factors such as a decrease in the price of gold or an increase in market interest rates;
- (ii) Whether the carrying value of the Company's net assets exceeding the Company's market capitalization; and
- (iii) The net cash flows generated by the assets being less than expected.

d) Other significant estimates

Other significant estimates where there is significant risk of material adjustments to assets and liabilities in future accounting periods include: determining the fair value measurements for financial instruments, the allocation of production costs to stockpiles of ore inventory and the recoverability of deferred income tax assets.

The Company estimates its income tax provision and deferred taxation in accordance with the prevailing tax rules and regulations, and taking into account any special approvals obtained from the relevant tax authorities in each location or jurisdiction in which the Company operates. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, the differences will impact on the income tax and deferred tax provisions in the period in which the determination is made.

Deferred tax assets are recognized for unused tax losses and deductible temporary differences, including those arising from the impairment provisions on receivables, inventories and property, plant and equipment and accruals of expenses not yet deductible for tax purposes, to the extent that it is probable that sufficient future taxable profits will be available to utilize those losses and temporary differences.

In the event that future tax rules and regulations or related circumstances change, adjustments to current and deferred taxation may be necessary which would impact on the Company's results or financial position.

Use of judgments

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgment in applying the Company's financial statements is the determination of functional currency. In accordance with IAS 21, "The Effects of Changes in Foreign Exchange Rates" (IAS 21) management determined that the functional currency of the Company is the Canadian dollar, the functional currency of Yantai Zhongjia Mining Co., Ltd. ("Zhongjia") and Yantai Mujin Mining Co. Ltd. ("Yantai Mujin") and all other Chinese subsidiaries of the Company is the Renminbi ("RMB") and the functional currency of Persistence, Majestic Yantai Gold Ltd ("Majestic Yantai"), PRG Res Holding 1 Ltd., PRG Res Holding 2 Ltd., PRG Res HK 1 Ltd., and PRG Res HK 2 Ltd. is the Hong Kong dollar ("HKD").

Foreign currency translation

Transactions in foreign currencies are initially recorded in the functional currency by applying exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the reporting date exchange rate.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are re-translated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on re-translation are recognized in profit or loss.

For the purposes of presenting the consolidated financial statements in the presentation currency of US dollars, the companies with functional currencies other than US dollars, the assets and liabilities are translated into US dollars

using the period-end exchange rate and the operations and cash flows are translated using the average rates of exchange over the period. Exchange differences arising when the opening net assets and the profit or loss are translated into US dollars are recognized in other comprehensive income and recorded in the Company's foreign currency translation reserve in equity. These differences are recognized in profit or loss in the period in which the operation is disposed.

3. New accounting standards, interpretations, and amendments

The Company has adopted the following new accounting standards, interpretations and amendments issued.

Amendments –IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures

In May 2024, the IASB issued amendments to update the classification and measurement requirements in IFRS 9 and related disclosure requirements in IFRS 7 as follows:

- Clarified the recognition and derecognition date of certain financial assets and liabilities and amended the requirements related to settling financial liabilities using an electronic payment system;
- Clarified how to assess the contractual cash flow characteristics of financial assets in determining whether they meet the sole payments of principal and interest criteria;
- New disclosures for certain instruments with contractual terms that can change cash flows;
- Additional disclosure requirements for financial instruments with contingent features that do not relate directly to basic lending risks and costs; and
- Amended disclosures relating to equity instruments designated at fair value through other comprehensive income.

The amendment did not have any significant impact on the Company's financial statements.

Amendments to IAS 21 -The Effects of Changes in Foreign Exchange

The amendments to IAS 21 specify how an entity shall assess whether a currency is exchangeable into another currency and how it shall estimate a spot exchange rate at a measurement date when exchangeability is lacking. The amendments require disclosures of information that enable users of financial statements to understand the impact of a currency not being exchangeable. Earlier application is permitted. When applying the amendments, an entity cannot restate comparative information. Any cumulative effect of initially applying the amendments shall be recognised as an adjustment to the opening balance of retained profits or to the cumulative amount of translation differences accumulated in a separate component of equity, where appropriate, at the date of initial application.

The amendment did not have any significant impact on the Company's financial statements.

Annual Improvements to IFRS Accounting Standards – Volume 11 set out amendments to IFRS 1, IFRS 7 (and the accompanying Guidance on implementing IFRS 7), IFRS 9, IFRS 10 and IAS 7.

Details of the amendments that are expected to be applicable to the Company are as follows:

- **IFRS 7 Financial Instruments: Disclosures:** The amendments have updated certain wording in paragraph B38 of IFRS 7 and paragraphs IG1, IG14 and IG20B of the *Guidance on implementing IFRS 7* for the purpose of simplification or achieving consistency with other paragraphs in the standard and/or with the concepts and terminology used in other IFRS Accounting Standards. In addition, the amendments clarify that the *Guidance on implementing IFRS 7* does not necessarily illustrate all the requirements in the referenced paragraphs of IFRS 7 nor does it create additional requirements. Earlier application is permitted. The amendments did not have any significant impact on the Company's financial statements.
- **IFRS 9 Financial Instruments:** The amendments clarify that when a lessee has determined that a lease liability has been extinguished in accordance with IFRS 9, the lessee is required to apply paragraph 3.3.3 of IFRS 9 and recognise any resulting gain or loss in profit or loss. In addition, the amendments have updated certain wording in paragraph 5.1.3 of IFRS 9 and Appendix A of IFRS 9 to remove potential confusion. Earlier application is permitted. The amendments are not expected to have any significant impact on the Company's financial statements.

3. New accounting standards, interpretations, and amendments (continued)

- *IFRS 10 Consolidated Financial Statements*: The amendments clarify that the relationship described in paragraph B74 of IFRS 10 is just one example of various relationships that might exist between the investor and other parties acting as de facto agents of the investor, which removes the inconsistency with the requirement in paragraph B73 of IFRS 10. Earlier application is permitted. The amendments are not expected to have any significant impact on the Company's financial statements.
- *IAS 7 Statement of Cash Flows*: The amendments replace the term "cost method" with "at cost" in paragraph 37 of IAS 7 following the prior deletion of the definition of "cost method". Earlier application is permitted. The amendments are not expected to have any impact on the Company's financial statements.

New accounting standards, interpretations and amendments issued not yet applied

There are new accounting standards, amendments to accounting standards and interpretations that are effective for annual periods beginning on or after January 1, 2026, and have not been applied in preparing the condensed consolidated financial statements for the six-month period ended June 30, 2026.

IFRS 18 Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, *Presentation and disclosure in financial statements* ("IFRS 18"), which replaces IAS 1, *Presentation of financial statements*. IFRS 18 introduces a specified structure for the income statement by requiring income and expenses to be presented in three defined categories (operating, investing and financing), and by specifying certain defined totals and subtotals. Where company-specific measures related to income statement disclosure are provided ("management-defined performance measures"), IFRS 18 requires additional disclosure around those management-defined performance measures in the financial statements. IFRS 18 also provides additional guidance on principles of aggregation and disaggregation which apply to the primary financial statements and the notes. IFRS 18 does not affect the recognition and measurement of items in the financial statements, nor does it affect which items are classified in other comprehensive income and how these items are classified.

The standard is effective for reporting periods beginning on or after January 1, 2027, including for interim financial statements. Retrospective application is required and early application is permitted. The Company is currently assessing the effect of this new standard to its financial statements in future periods.

IFRS 19 Subsidiaries without Public Accountability: Disclosures

IFRS 19 allows eligible entities to elect to apply reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other standards. To be eligible, at the end of the reporting period, an entity must be a subsidiary as defined in IFRS 10 Consolidated Financial Statements, cannot have public accountability and must have a parent (ultimate or intermediate) that prepares consolidated financial statements available for public use which comply with IFRS accounting standards. Earlier application is permitted. As the Company is a listed company, it is not eligible to elect to apply IFRS 19. Certain of the Company's subsidiaries may consider the application of IFRS 19 in their financial statements.

Amendments to IFRS 10 - Consolidated Financial Statements and IAS 28 - Investments in Associates and Joint Ventures

The amendments to IFRS 10 and IAS 28 address an inconsistency between the requirements in IFRS 10 and in IAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments require a full recognition of a gain or loss resulting from a downstream transaction when the sale or contribution of assets constitutes a business. For a transaction involving assets that do not constitute a business, a gain or loss resulting from the transaction is recognised in the investor's profit or loss only to the extent of the unrelated investor's interest in that associate or joint venture. The amendments are to be applied prospectively. The previous mandatory effective date of amendments to IFRS 10 and IAS 28 was removed by the IASB. However, the amendments are available for adoption now. The Company is currently assessing the effect of these amendments to its financial statements in future periods.

19. Share capital and Reserves (continued)

d) Stock Options (continued)

The Company has a shareholder approved “rolling” stock option plan (the “Plan”) in compliance with the TSX-V’s policies. Under the Plan, the maximum number of shares reserved for issuance may not exceed 10% of the total number of issued and outstanding common shares at the time of granting. The exercise price of each stock option shall not be less than the discounted market price of the Company’s stock at the date of grant. Such options will be exercisable for a period of up to 10 years from the date of grant. In connection with the foregoing, the number of common shares reserved for issuance to any one optionee will not, within a twelve-month period, exceed five percent (5%) of the issued and outstanding common shares and the number of common shares reserved for issuance to all technical consultants will not exceed, within a twelve-month period, two percent (2%) of the issued and outstanding common shares. Options may be exercised no later than 90 days following cessation of the optionee’s position with the Company or 30 days following cessation of an optionee conducting investor relations activities’ position.

The continuity of stock options for the six months ended June 30, 2026 is as follows:

Expiry date	Exercise price	Balance December 31, 2025	Issued	Exercised	Expired/ Cancelled	Balance June 30, 2026
June 30, 2030	CAD\$0.15	26,500,000	-	-	-	26,500,000
Weighted average exercise price		CAD\$0.15	\$ -	\$ -	\$ -	CAD\$0.15

On June 30, 2025, the Company granted a total of 26,500,000 stock options to directors, management and employees. These stock options, exercisable at CAD\$0.15 per share, vested immediately and have a five-year term to expiry.

The fair value of stock options granted was \$1,177,216 (CAD\$1,606,025), which was recorded as an expense to share-based compensation. The fair value of the options granted was determined using the Black-Scholes option pricing model with the following assumptions: a risk-free interest rate of 2.83%, an expected volatility of 73.52%, an expected dividend rate of 6.99%, and an expected life of 5 years, for a weighted average fair value per option of \$0.06.

Details of stock options outstanding as at June 30, 2026, are as follows:

Exercise Price	Expiry Date	Options outstanding	Weighted average exercise price	Weighted average remaining contractual life in years
CAD\$0.15	June 30, 2030	26,500,000	CAD\$0.15	4.00

As at June 30, 2026, all stock options were exercisable.

The Company’s subsidiary, Persistence, has a shareholder approved stock option plan (the “PGG Plan”) in compliance with the HKEX’s policies. Under the PGG Plan, the maximum number of shares reserved for issuance may not exceed 10% of the total number of issued and outstanding common shares at the time of granting. The exercise price of each stock option shall not be less than the highest of i) the closing price of shares as stated in the HKEX’s daily quotations sheet on the date of grant, which must be a Business Day; ii) the average closing price of shares as stated in the HKEX’s daily quotations sheet for the five (5) Business Days immediately preceding the date of grant; and iii) the nominal value of the shares. Such options will be exercisable for a period of up to 10 years from the date of grant. Options may be exercised no later than 1 month following cessation of the optionee’s position with the Company.

19. Share capital and Reserves (continued)

d) Stock Options (continued)

The continuity of stock options for the six months ended June 30, 2026 is as follows:

Expiry date	Exercise price	Balance December 31, 2025	Issued	Exercised	Expired/ Cancelled	Balance June 30, 2026
July 11, 2035	HKD\$1.50	21,000,000	-	-	(1,000,000)	20,000,000
Weighted average exercise price		HKD\$1.50	\$	-	\$	HKD\$1.50

On July 11, 2025, Persistence granted a total of 21,000,000 stock options to directors, management and employees. These stock options, exercisable at HKD\$1.50 per share, with 40% vesting over one year, 30% vesting over two years and 30% vesting over three years and have a ten-year term to expiry.

The fair value of stock options granted was \$2,005,207 (HKD\$15,740,075). Of this amount, \$608,746 (HKD\$4,751,917) was recorded as an expense to share-based compensation for the year ended December 31, 2025. The remaining fair value will be expensed to share-based compensation as the options vest over the next three years. The fair value of the options granted was determined using the Black-Scholes option pricing model with the following assumptions: a risk free interest rate of 3.37%, an expected volatility of 62.78%, an expected dividend rate of 2.85%, and an expected life of 10 years, for a weighted average fair value per option of \$0.10 (HKD\$0.75). For the six months ended June 30, 2026, \$642,285 (HKD \$5,054,062.93) was recorded as an expense to share-based compensation.

Details of stock options outstanding as at June 30, 2026, are as follows:

Exercise Price	Expiry Date	Options outstanding	Weighted average exercise price	Weighted average remaining contractual life in years
HKD\$1.50	July 11, 2035	20,000,000	HKD\$1.50	9.04

As at June 30, 2026, all stock options issued under the PGG Plan were not fully vested and therefore were not exercisable.

e) Reserves

Share-based payment reserve

The share-based payment reserve records items recognized as stock-based compensation expense and other share-based payments. This reserve also includes the value attributed to warrants on unit private placements. At the time that the stock options or warrants are exercised, the corresponding amount will be transferred to share capital.

Foreign currency translation reserve

The foreign currency translation reserve records unrealized exchange differences arising on translation of group companies that have a functional currency other than the Company's reporting currency.

Safety fund surplus reserve

Pursuant to a Notice regarding Safety Production Expenditure jointly issued by the Ministry of Finance and the State Administration of Work Safety of the People's Republic of China ("PRC") in February 2012, Zhongjia and Yantai Mujin are required to establish a safety fund surplus reserve based on the volume of mineral ore extracted. The safety fund can only be transferred to retained earnings to offset safety related expenses as and when they are incurred, including expenses related to safety protection facilities and equipment improvement and maintenance as well as safety production inspection, appraisal, consultation and training.

Statutory surplus reserve

In accordance with the Company Law of the PRC and the Articles of Association of Zhongjia and Yantai Mujin, both companies are required to allocate 10% of its profit after tax determined under PRC accounting standards to the statutory surplus reserve until such reserve reaches 50% of the authorised share capital of the company. Subject to certain restrictions set out in the Company Law of the PRC, part of this reserve may be converted to increase the share capital, provided that the remaining balance after the capitalisation is not less than 25% of the authorized share capital.

22. Risks and capital management

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash and cash equivalents, receivables and reclamation deposits held in bank accounts. The majority of the Company's cash is held on deposit with major banks in Canada and China. The credit risk associated with cash held in Canada is reduced by management ensuring that the Company uses a major Canadian financial institution with strong investment grade ratings by a primary ratings agency. The credit risk associated with cash held in China is reduced, but not fully mitigated, by management using a financial institution that is operated by the Government of China. The Company is also exposed to credit risk in respect to its receivables. In order to minimize the credit risk with regards to receivables, the Company reviews the recoverable amount of each individual receivable periodically and with management also having monitoring procedures to ensure the follow-up action is taken to recover overdue receivables.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company plans to ensure that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash. The Company's cash is invested in interest bearing accounts which are available on demand. Management believes the Company has sufficient cash on hand to finance operations for the next twelve months. The Company's accounts payable and accrued liabilities are generally due on demand. The maturity of the Company's loans are disclosed in Notes 14 and 16.

The following summarizes the undiscounted amount of the remaining contractual maturities of the Company's financial liabilities.

Industry Risk (continued)

mining industry, a decline in the price of commodities, uncertainties inherent in estimating mineral resources and fluctuations in the foreign currencies against the US dollar. The Company does not use derivatives or hedging to mitigate the risk of changes in the price of gold or currency fluctuations.

The Company's business is highly dependent on the price of gold and venture capital markets, which are impacted by volatility factors the Company cannot control. A decrease in the price of gold could adversely affect the Company's financial condition, results of operations and cash flows. Lower gold prices may result in asset impairment, write-downs of mineral property carrying values and limitations in access to capital.

The Company operates in China and is exposed to the laws governing the mining industry in China. The Chinese government is currently supportive of the mining industry but there is uncertainty in future changes to government policies and regulations including taxation, repatriation of profits, restrictions on production, export controls, environmental compliance, and expropriation. These factors could adversely affect the Company's exploration efforts and production plans.

The Company's properties are located in an area that can experience severe winter weather conditions which could adversely affect mining operations. In addition, the Company is subject to changes in environmental laws and regulations that may result in unexpected costs.

Market Risk

The significant market risks to which the Company is exposed are interest rate risk, currency risk and other commodity price risk. These are discussed further below:

Interest Rate Risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company's cash consists of cash and reclamation deposits held in bank accounts that earn interest at variable interest rates. The Company's loans payable accrue interest at fixed rates. Due to the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on the estimated fair value as of June 30, 2026.

Foreign exchange risk

The Company reports its financial statements in USD. The functional currency of the Company is CAD, the functional currency of all intermediate holding companies is HKD and the functional currency of its Chinese subsidiary is RMB. The Company is exposed to foreign exchange risk when the Company undertakes transactions and holds assets and liabilities in currencies other than its functional currencies.

The Company currently does not engage in foreign exchange currency hedging. The Company's exposure to currency risk affect net income is summarized as follows:

Impact on net income of a 10% change in the U.S. dollar exchange rate	June 30, 2026	December 31, 2025
Financial assets denominated in U.S. Dollars	\$ 1,636,358	\$ 1,141,220

As at June 30, 2026, with other variables unchanged, a 10% strengthening (weakening) of the USD against the Company's functional currencies, would have decreased (increased) net income by approximately \$1.64 million (FYE2025 - \$1.14 million).

Currency Risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company is exposed to currency risk to the extent expenditures incurred or funds received and balances maintained by the Company are denominated in currencies other than the functional currency of the entity completing the transaction or holding the funds. The Company does not manage currency risks through hedging or other currency-based derivatives. At June 30, 2026, the Company and its subsidiaries hold \$16,363,576, exposing the Company to currency risk.

23. Financial Instruments

Fair Value

Management has assessed that the fair values of cash and cash equivalents, restricted and pledged deposits, financial assets included in prepayments, deposits and receivables, financial liabilities included in accounts payables, deposits received, amounts due to related parties, other long-term liabilities approximate to their carrying amounts largely due to the short-term maturities of these instruments.

The fair values of other long-term assets and other long-term liabilities have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The following tables set forth the Company's financial assets and liabilities that are measured at fair value level on a recurring basis within the fair value hierarchy at June 30, 2026 and December 31, 2025 that are not otherwise disclosed. The assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Financial assets	Level	June 30, 2026	December 31, 2025
